Hi Michele,

Sorry, I have not gotten feedback from D4 on the topic yet but surely we will have some more info on timelines by next week's meeting. We will have a 4-day work week, since Monday is the Cesar Chavez holiday. Wednesday or Friday is free with me. Thanks.

Jerry

Hi Jerry,

Just following up on your note from last Friday. Would you kindly propose a few dates for our next meeting, perhaps next week, as that will have been a month since our last meeting.

Thanks!

Also, regarding Elk Hills, thank you for confirming that the area/zone where the Class II wells are located are the same as the Class I wells. That is what I had recalled. The "inclusion" for the Class II wells will apply to the Class I wells once the aquifer exemption is approved. Based on your note it seems that documentation has not yet been submitted to DOGGR? We would be interested in knowing what the planned timeline is for that submittal.

Regards, Michele

Hi Michelle,

I'm getting an update from D4 on this. I'll get back to you Monday and then maybe we can talk about setting a date.

Reading the MOA, our exempted aquifers only cover Class II activities. I'm expecting that the AE documentation will cover only class II wells, however, the area/zone where these Class II wells are located are the same for the Class I wells, so these latter wells will be covered by "inclusion". The question of Class I coverage for this Class II AE application is something that is EPA's to consider.

Have a good weekend!

Jerry

Hello Jerry,

It's already been two weeks since we had our last meeting. Wow time is flying! Let's get the next meeting on the calendar. Can you propose a few dates and I will run them past my colleagues? Thanks.

Also, could you please give me a specific update on the AE at Elk Hills? I recall you said they are preparing a packet which will include the Class II wells which in turn would cover the Class I wells, but was that packet submitted, or do you have a timeline for that?

Regards, Michele
